In February 2021, **Le Shuttle Freight** transported 99,787 trucks, a decrease of 24% compared to February 2020, in a market still marked by the adjustments to new post-Brexit administrative rules, but with a trend towards normalisation. The compulsory requirement to present a negative Covid test, carried out on British soil less than 72 hours previously, for trucks entering France remains the most restrictive provision for cross-Channel logistics chains.

In February 2021, **Le Shuttle** transported 31,277 passenger vehicles. The passenger market obviously remains severely impacted by the travel restrictions put in place by the British and French governments due to the pandemic.

March traffic figures will be published on Friday 9 April 2021 before the markets open.
